

# Energy UK Young Energy Professionals Forum

Membership Survey

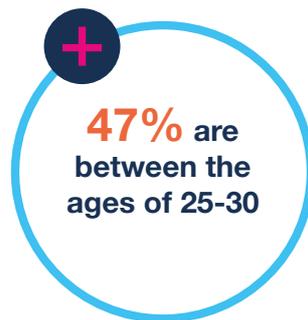

September 2017 - Results November 2017

## In facts and figures

### Reaching new audiences...

This is a good sign and shows we are continuing to encourage new YEPs to sign up to the Forum.

### The right demographic...

Our Forum is targeting those new to the industry, this figure shows we have the right ages within the Forum.

### A broad mix of careers...

Our Forum has a broad mixture of careers with the majority working in an energy supply business.

### More networking...

More of the members have placed a greater emphasis on wanting opportunities to network.

### Improving our events...

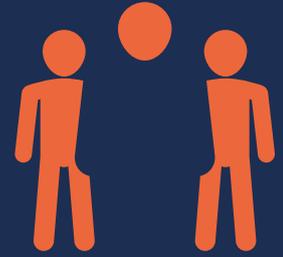

We hold a number of panel events, it was clear from the survey, these remain popular for YEPs to attend.

### Not just London..

Whilst the majority of YEPs surveyed are in London, we need to ensure not all events are based there.

# Energy UK Young Energy Professionals Forum

## Membership Survey

September 2017 - Results November 2017

### How well is the Forum doing currently?

Respondents were asked against the below statements, how well the YEP Forum meets those needs out of five. The average from all respondents is below.

The YEP Forum provides opportunities to network at events

4.12

#### A good Forum to network in...

Respondents view the Forum as very good at providing opportunities to network. 38% listed it as 5/5.

The YEP Forum provides access to industry leaders & knowledge sharing

3.84

#### Providing access to industry...

These results show the Forum is good at providing access to industry leaders.

The YEP Forum provides opportunities to showcase & recognise your work

3.58

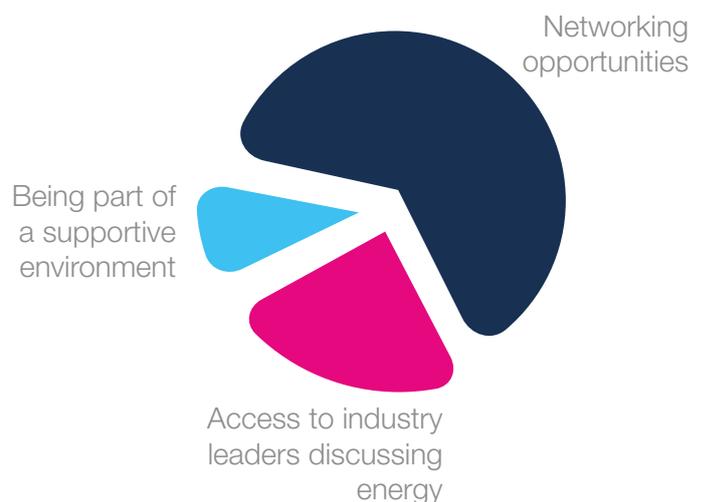

#### Improving recognition...

Whilst the YEP Awards provide a platform to recognise each other annually, more can be done.

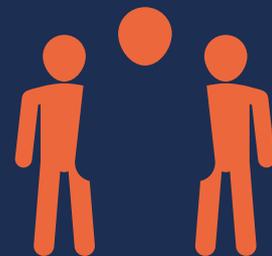

### What do you value most about your YEP membership?

#### Our respondents value what we offer...

Respondents want to be able to network primarily. However having access to industry leaders, being part of a supportive environment and showcasing your organisations role was also valued highly.

Membership Survey

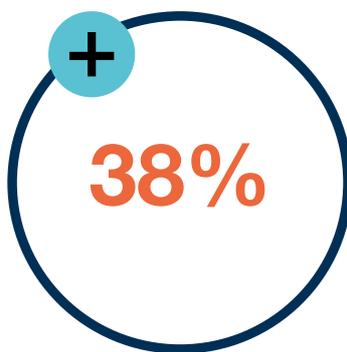

September 2017 - Results November 2017

## Improvement is needed...

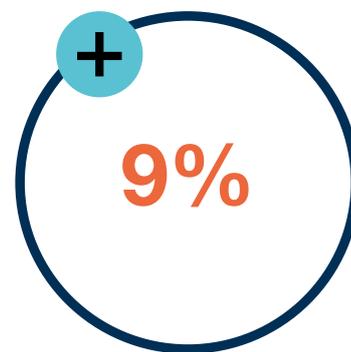

### Less attendance...

A large majority of respondents haven't attended an event in the last nine months.

### Chance for involvement..

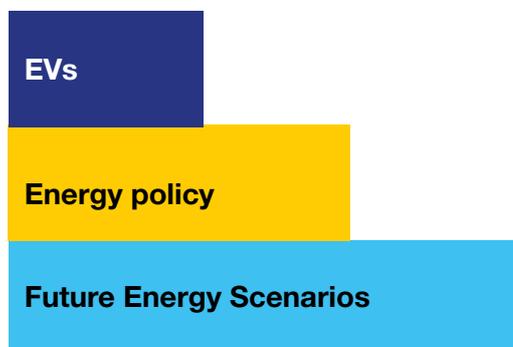

A good proportion of respondents are interested in being more involved with the Forum.

### More social...

A very small number preferred Twitter for YEP to engage with. Compared to 89% for email.

## What topics should we focus on?

### A clear direction for future events...

Respondents made a clear indication towards being interested in events which focus on arguably the most topical topics at this point in time.

These are all heavily publicised currently, therefore it should be noted, these are likely to vary significantly dependent on what is occurring within the energy industry.

“It’s great to be given the opportunities to get out into the industry and meet new people share new experiences and learn new things.”

“Possibly doing more webinars on hot topics to increase frequency of sessions and reduce need for travel to make them inclusive to a wider network.”

“I think that it would be useful to have more workshop type events or panel discussions made up of Young Professionals to find out about what other YEP members are doing, rather than just hearing from industry leaders (although I do find presentations from industry leaders’ useful and informative).”

“It’s great that YEP is listening to the concerns and views of its members in order to better place itself at the heart of the industry.”

“The evening events I have attended have been well organised and provided great opportunities to learn more about the Energy Industry, however, I would be interested in attending more of these events (in London).”

“I joined YEP to meet like minded people, who are going through the industry at the same time as me. Others who can share their knowledge with you and you with them.”

“Hold events further afield to allow easier access for participants in the North. Also cater more for those working upstream in power generation and related engineering operations.”
